

KWA THEMA CAMPUS

8 May 2014

**TO WHOM IT MAY CONCERN**

The Ekurhuleni East College contracted Audio Visual Centre (AVC) with the assistance of TOA Electronics Southern Africa (Pty) Ltd to design and install an effective and efficient audio visual system with multiple wireless microphones into the Kwa Thema Campus hall.

The system provided comprises of:

- 1 x TOA A-1724 240w Amplifier
- 1 x TOA P-2240 240w Power Amplifier
- 1 x TOA M-633D (One Touch) Digital Mixer
- 8 x TOA F-2852C 60w Wide Dispersion Ceiling Speakers
- 3 x TOA WM-5270 16 Channel UHF Handheld Wireless Microphones
- 1 x TOA WM-5325 / YP-M5300 16 Channel UHF Lapel Wireless Microphone
- 4 x TOA WR-5800 64 Channel UHF True Diversity Wireless Receivers
- 1 x Vivitek D-5010 Overhead Data Projector with a STD lens / Grandview 240" Big Screen

The TOA M-633D Digital Mixer was chosen due to its "One Touch" ease of operation as well as Automatic Resonance Control, Automatic Clip Guard and Automatic Feedback Suppression.

The TOA UHF Microphones were chosen due to ICASA compliance, as well as their efficiency (resulting in less battery power being required) and their durability.

We are very pleased to say that the quality of sound provided by the system is fantastic, whether the room is sparsely populated or filled to capacity. The service and technical support provided by AVC and TOA is of a very high standard and we would strongly recommend the TOA brand.

Sincerely,

GJC Esterhuizen

Campus Manager: Kwa Thema Campus
