

MX-6224D

Digital Mixer Amplifier

The number of mosques around the world is rapidly increasing however there are very few sound systems that can match their complex needs, as well as their tight budget. TOA have created the MX-6224D, an affordable digital mixer amplifier, specifically to cater for medium and small mosques. The MX-6224D is a reliable and simple system, needing very little technical knowledge to operate, yet still maintains exceptional sound quality.

We supply sound, not equipment.
